LECHUZA (pronounced “le-choo-zah”) is Spanish for “owl.” We gave our planters this name because the **LECHUZA** sub-irrigation system watches over your plants like a wise owl, ensuring that they always receive the care they need for optimal growth.

LECHUZA is the expert for attractive and functional planters and garden furniture made of high-quality plastic.

It's no coincidence that we are one of the leading specialists for sophisticated planters, both in terms of form and function, made of modern plastic. Our expertise comes from the **PLAYMOBIL** brand, which is deeply rooted in **LECHUZA's** origins.

Innovations have always driven us forward. These are reflected in the **LECHUZA** brand with the sophisticated functionality, proven quality and exceptional design of all of our product developments.

The **LECHUZA** sub-irrigation system, high-quality coated surfaces and a number of national and international accolades and design awards are the best proof of this.

Our planters grow with your needs

From table decorations to room installations – our planters are guaranteed to grow with you thanks to size variations of all kind. Set boundaries without fencing yourself in. LECHUZA planters offer a wide variety of colors and designs combined with reliable functionality to let your creativity unfold and help you realize your ideas without having to compromise. Indoors and out.

WE ARE PASSIONATE ABOUT PLASTIC

High-quality products require high-quality raw materials.

At LECHUZA, PP (polypropylene) and ABS (acrylonitrile butadiene styrene) are the basis for the robust plastic planters that have unique quality characteristics and are made using a specialized processing method.

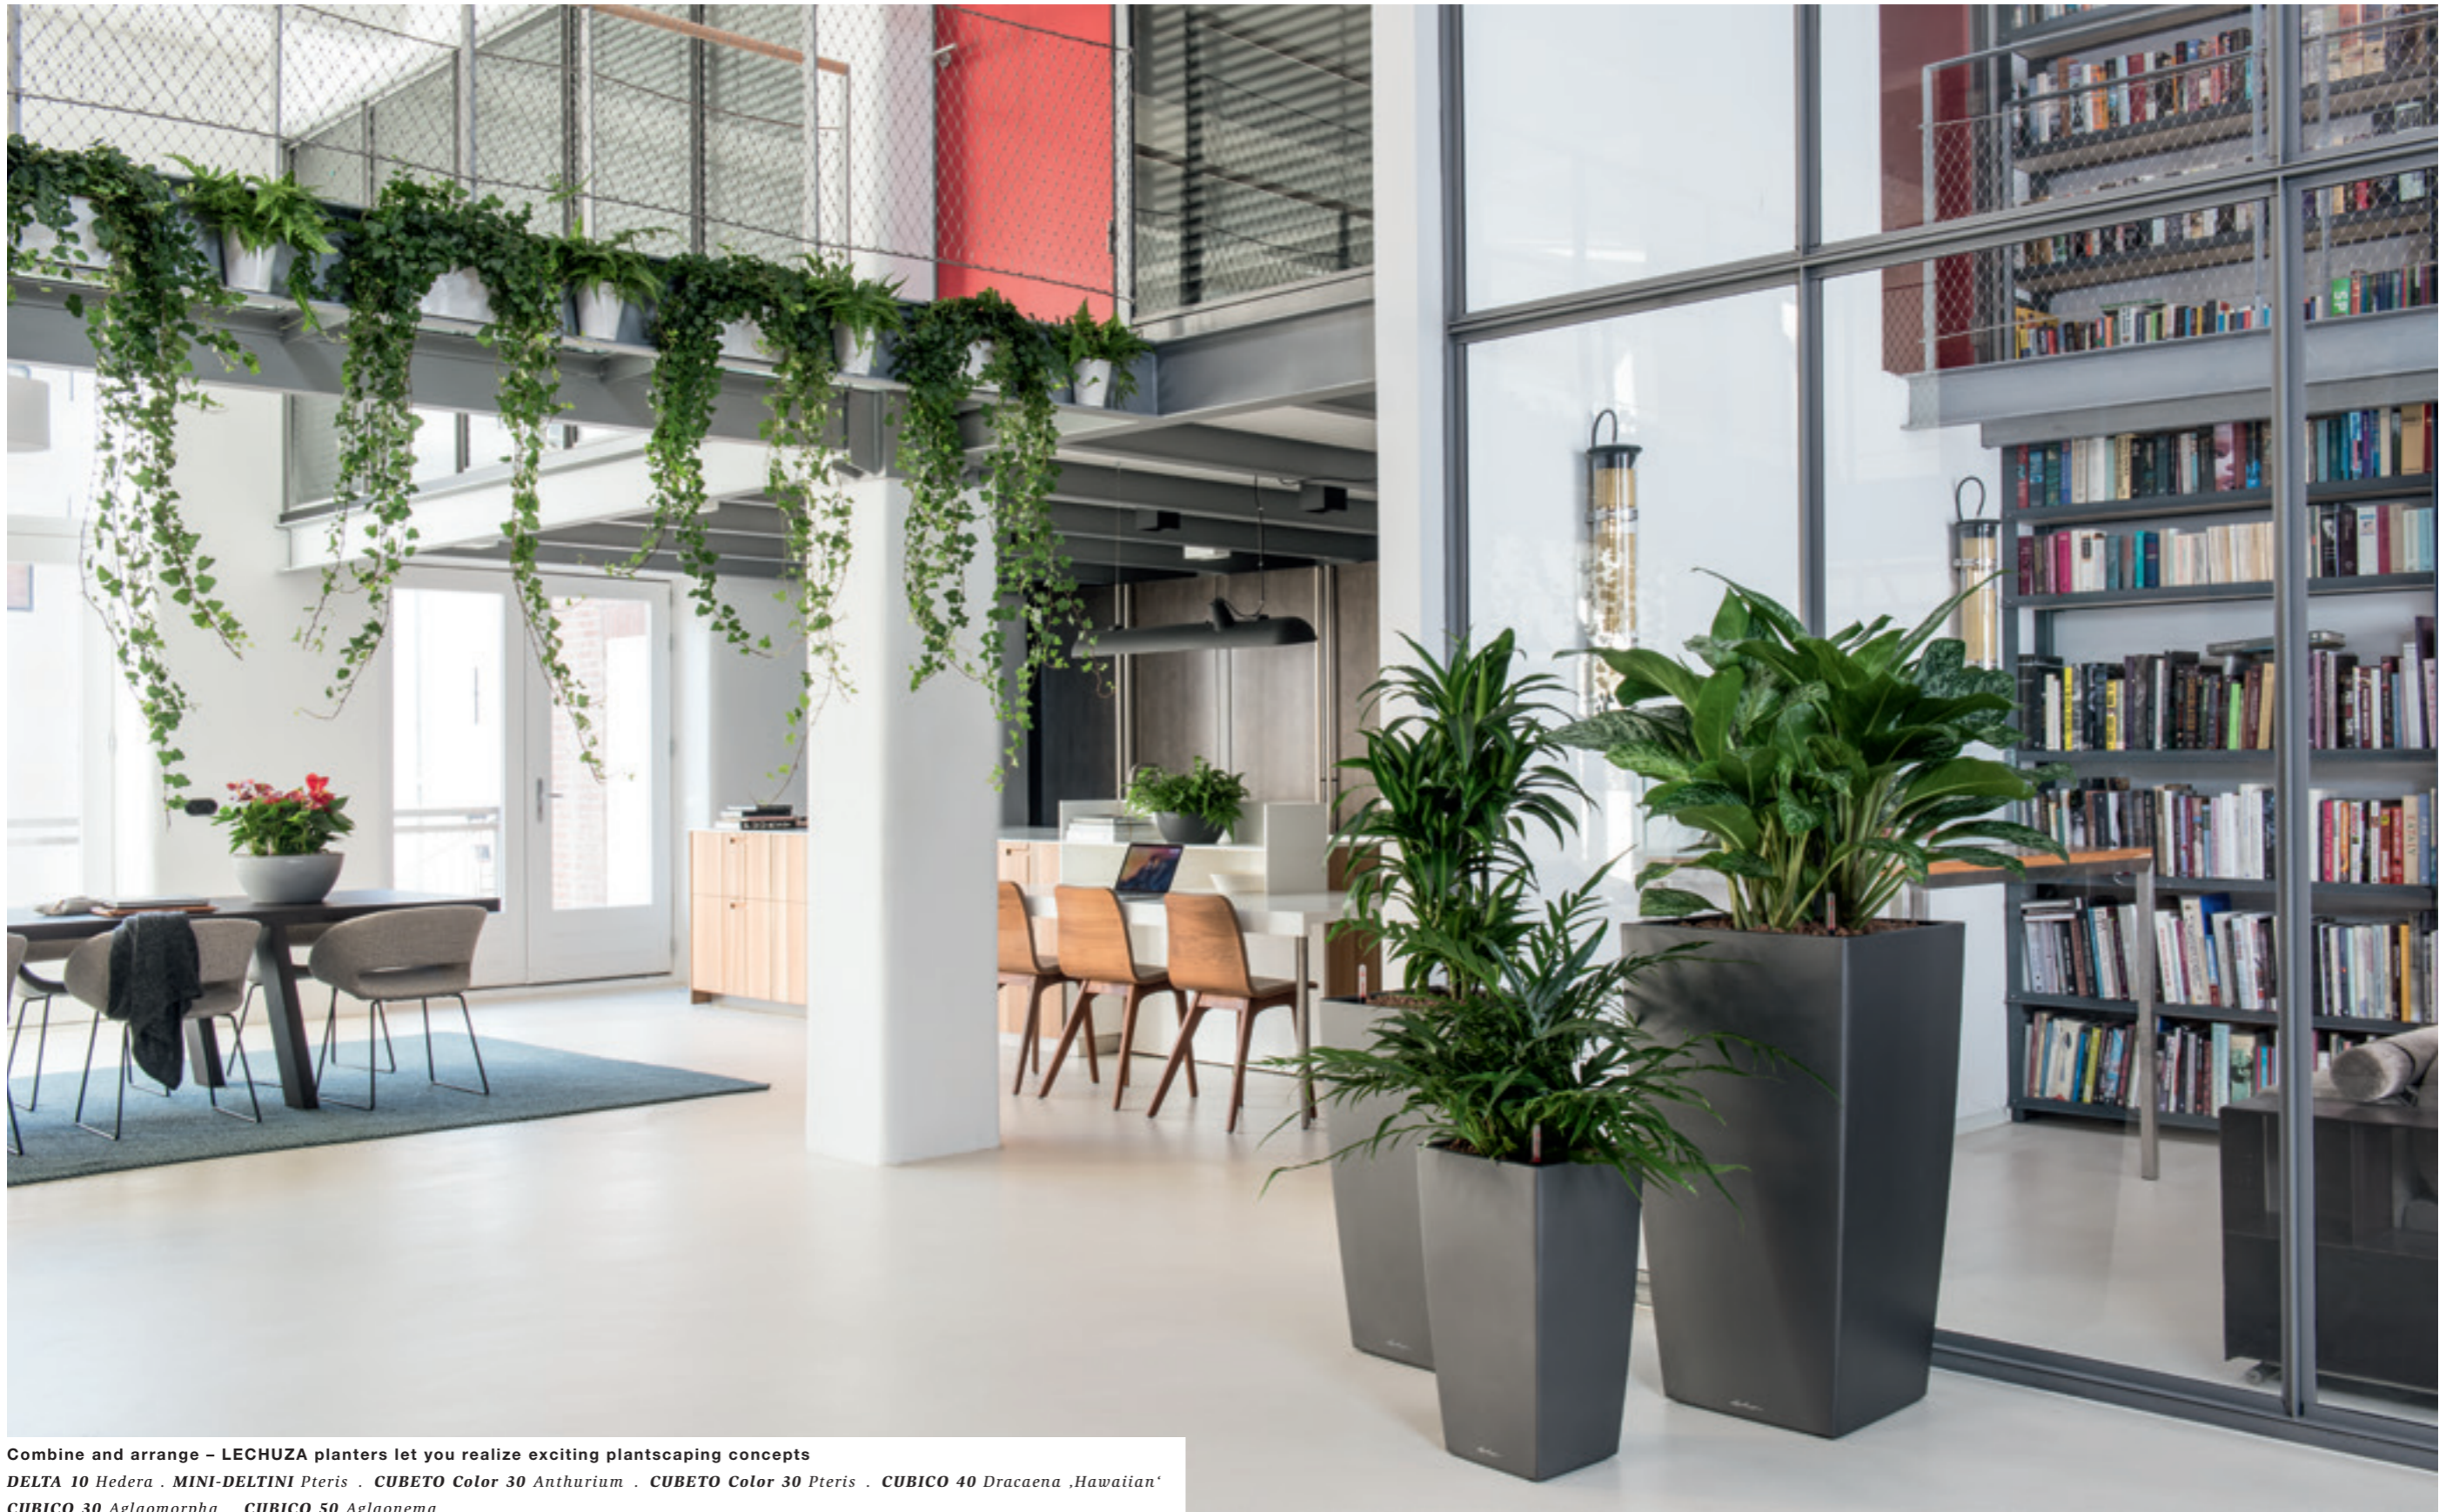

LECHUZA products are shatterproof, UV-resistant, frostproof, weather-resistant, easy to clean and naturally waterproof. This ensures that will provide you with years of joy, both indoors and out.

WE ARE COMMITTED TO SUSTAINABILITY

We want our products to have a long life, not only for quality reasons but also to protect our environment. All LECHUZA products are fully recyclable and we also use recycled granules when manufacturing LECHUZA accessories.

The latest injection molding technologies and methods guarantee that materials are used in a resource-conserving way. Our ISO 50001 and 14001 certifications ensure that we always comply with the international standards for energy and environmental management.

This concept of sustainability continues in the LECHUZA sub-irrigation system, which offers the best conditions for growth even for demanding plants – all with very little maintenance effort and long watering intervals.

Combine and arrange – LECHUZA planters let you realize exciting plantscaping concepts

LECHUZA table planters for architectural plantscaping thrive on its attention to detail and not on spending a lot of effort on plant care.
MINI-DELTINI Pteris . DELTA 10 Hedera

MINI & MAXI-CUBI

Table, sideboard or windowsill? There's no question about it, MINI and MAXI-CUBI set tasteful accents no matter where you put them.

NEW

(MINI-)DELTINI & DELTA 10/20

The permanent alternative to a bouquet of flowers that promises lasting enjoyment of flowering plants.

CURSIVO

A simple, yet elegant cube with a curved cut – opposites attract, creating the harmonious, inspiring dynamic of CURSIVO.

RONDO

For an indoor sculpture garden, RONDO offers an elegant, delicate shape for green works of art.

CUBE

Cultivates the bauhaus concept in its purest form.

NEW

CUBICO & CUBICO Alto

Functionality in its highest form and a broad range of sizes, colors and accessories make CUBICO perfect for anyone who wants to master the art of plantscaping.

DELTA

It's not only the perfect home for plants and flowers that are vase ready. DELTA is also a planter with countless benefits thanks to the LECHUZA sub-irrigation system.

CANTO

Anyone who sees plantscaping concepts as an integral part of building architecture will love the clear lines offered by the elemental style of the CANTO planters.

CLASSICO LS

Timeless planter design with exquisite surfaces and intelligent inner workings: LS (= "liner system") describes the interchangeable plant liner featuring color-coordinated recessed decorative handles.

CARARO

The perfect room divider – creates boundaries without fencing you in. CARARO is 29.5 inches tall, opening up a whole new world of creative planting.

QUADRO

The quadratic planter style features an integrated liner system (LS), with sturdy, color-coordinated decorative handles.

NEW

LECHUZA planters meet even the highest aesthetic designs without demanding too much care.
CLASSICO 60 Chrysalidocarpus

Arrangements reminiscent of sculptural designs are RONDO's specialty. The option of selecting customized coatings in RAL colors is another bright idea from LECHUZA.

RONDO 40 RHIPSALIS

A GREEN PARTNERSHIP FOR ATTRACTIVE GROWTH

We understand what professionals want, so we create partnerships that are always growing new ideas. We offer you a range of unique services so that your customers can enjoy your most creative ideas

Wide variety of variable planters

Planter sizes that grow with you, available in numerous sizes, to ensure that plants can continue to grow in the same shaped planter

Worry-free repurchase or additional purchase of models thanks to long color fidelity in the PREMIUM assortment

Rapid delivery from our warehouse in Germany

Special coatings in RAL colors available for PREMIUM planters

Semi-hydro system for indoor and outdoor areas for the CUBICO, CUBE and RONDO planters

Time spent on watering and care reduced

PLANT VITALITY

boosts employee vitality

Studies show that wherever plants grow, productivity does too because plants provide better air quality, improved air humidity, and even reduce noise levels. The result is less vulnerability to illnesses and a climate that motivates employees and customers.

LECHUZA LEAVES PLANTS TO NATURE

Plants naturally know best how much water they need for optimal growth. This is why the LECHUZA sub-irrigation system helps plants care for themselves.

Water is the life blood of every plant. But too much or too little water can be harmful to plants. So how much is enough in nature? The LECHUZA sub-irrigation system leaves this to your plants. Simply check the water level indicator to ensure the water reservoir is always kept sufficiently full. Your plants will care for themselves, just like in nature. This makes dried out or waterlogged roots a thing of the past.

LECHUZA-PON pellets care for plants as nature intended and act as a drainage layer between the water reservoir and the plant substrate, creating a buffer for the water supply to the roots. Your plants are in their element with LECHUZA.

BETTER GROWTH

The optimal mixture of water and nutrient supply for strong, healthy plants

“The LECHUZA watering system ensures a steady, reliable supply of water to houseplants and outdoor plants in professional and leisure gardening. When combined with LECHUZA-PON plant substrate it makes cultivating plants easier and more dependable. Plants with different demands in terms of location and water supply all thrive in LECHUZA. Water and nutrients are reliably transported from the water reservoir all the way down to the root balls of the plants, so that healthy strong plants can grow in LECHUZA.”

EVA-MARIA GEIGER, LEAD EXPERT ORNAMENTAL PLANTING,
BAVARIAN INSTITUTE FOR WINE CULTIVATION AND HORTICULTURE

Add color to the mix. In addition to the assortment colors, the CUBICO and RONDO models can also be produced in custom corporate colors using the RAL system.

THE LECHUZA COASTER MAKES PROFESSIONALS' LIVES EASIER

Characteristic of LECHUZA is that we take care of everything for you.

The coaster designed for selected LECHUZA models makes our planters moveable in every direction. This means you can easily move up.

CUBICO COASTER

CUBICO 30 and 40 coasters disappear under a designer frame that closes the column planters all the way down to the floor.

For CUBICO 30, 40

COASTER FOR CUBE, CLASSICO, QUADRO

These convenient coasters completely disappear under every planter size 43 and larger.

For CLASSICO 43, 50, 60, 70 // QUADRO 43, 50 // CUBE 40, 50

Well thought out accessories. CLASSICO coaster is invisible under planter. CLASSICO 50 *Ficus microcarpa*

FERTILIZER AND PLANT SUBSTRATE FROM LECHUZA

Optimum care for plants. One less thing to worry about.

To ensure your ideas find fertile soil in which to thrive, LECHUZA offers comprehensive, worry-free service specially developed for the LECHUZA sub-irrigation system.

LECHUZA FERTILIZER

The slow-release fertilizer developed especially for the LECHUZA sub-irrigation system (NPK 15-11-14+2+trace elements) is suitable for all types of plants. It remains in the water reservoir for a longer period of time so, you only need to fertilize your plants twice per year.

LECHUZA-PON PLANT SUBSTRATE

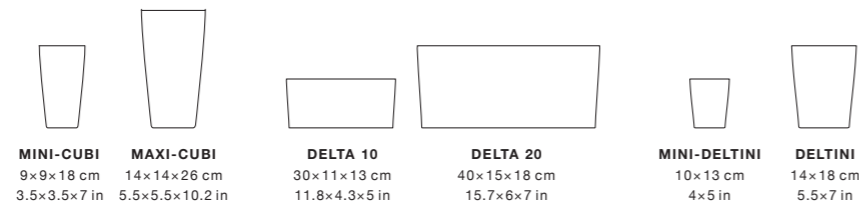

The inorganic LECHUZA-PON plant substrate (15-11-14+2+ME) is suitable for complete plantings. It is made from pumice, zeolites, lava and LECHUZA depot fertilizer. The substrate features long-term structural stability for an even water supply and the right amount of nutrients. LECHUZA-PON can be purchased in commercially available package sizes or as a Big Pack.

LECHUZA-TERRAPON* PLANT SUBSTRATE

LECHUZA-TERRAPON is an organic plant substrate that is ideal for outdoor use. It pairs the advantages of organic humus with the mineral elements such as pumice and expanded clay along with an effective fertilizer component. The natural clay acts as a natural nutrient and water reservoir.
